Re: CCB Texas Licenses, LP
KPRC (AM), Houston, Texas
Facility Identification Number: 9644
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed January 5, 2010, on behalf of CCB Texas Licenses, LP ("CCB"). CCB requests extension of the special temporary authority ("STA") granted on June 17, 2009, to operate Station KPRC¹ during nighttime hours with operating parameters derived from a Method of Moments ("MOM") proof of performance, pending the filing and processing of an application for modification of license based on the MOM proof. In support of the request, CCB states that its application for license remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KPRC may

¹ KPRC is licensed for operation on 950 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

operate with its substantially adjusted nighttime directional antenna system pending the filing and processing of an application for modification of license supported by a MOM proof of performance pursuant to 47 C.F.R. Section 73.151(c). Operating parameters shall be maintained as specified in the request². It will be necessary to reduce power or cease operation if complaints of interference are received. CCB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 8, 2010**.

Sincerely,

Charles N. Miller, Engineer
Audio Division
Media Bureau

cc: CCB Texas Licenses, LP

² Operating parameters shall be maintained within $\pm 5\%$ current ratios and $\pm 3^\circ$ phase of the following:

Tower #	Nighttime Ratio	Nighttime Phase
1	0.429	-122.7°
2	1.000	0.0°
3	0.513	166.1°
